

General Practitioner's Pass

We have developed this course program to best equip general practitioners and sonographers working in a general medical practice with all the tools they need to integrate and efficiently leverage the diagnostic capabilities of ultrasound. Integrating the program's content with standard patient care based on physical examination and laboratory analysis will help you take a comprehensive approach to providing optimal care and treatment for your patients. After completing this course, you will be able to use ultrasound to rule out many differential diagnoses in just one minute and ultimately decide if your patients need to be referred to a specialist or the clinic.

Chapter 1 | CME

Abdomen

This chapter teaches you how to extend your physical exam in cases of abdominal pain and urinary issues using ultrasound for kidneys, urinary tract, biliary system as well as eFAST.

Lectures & Quizzes:

- GP Pass - Kidney
- GP Pass - Urinary tract
- GP Pass - Biliary tract
- GP Pass - eFAST
- Quiz - Abdomen

Chapter 2 | CME

Heart and Lung

In this chapter, you will learn how to examine the heart for common pathologies and how to recognize frequent pulmonary pathologies such as pleural effusions. You will also learn how to recognize deep vein thrombosis (DVT) as an additional tool in suspected pulmonary embolism to ensure proper and prompt treatment.

Lectures & Quizzes:

- GP Pass - Heart
- GP Pass - Lung
- GP Pass - DVT
- Quiz - Heart and Lung

Thyroid

In this chapter on the basics of thyroid ultrasound, we will show you how to examine the thyroid gland and describe your findings. You will learn to recognize primarily benign lesions such as goiter and nodules, and you will be able to detect some signs of malignancy!

Lectures & Quizzes:

- GP Pass - How to image - Part 1
- GP Pass - How to image - Part 2
- GP Pass - Goiter - Part 1
- GP Pass - Nodules Basics
- Quiz - Thyroid
