## Chapter 2 | 1 CME

### Gynecology

In this chapter, we will be focusing on the gynecological aspect of our OB/GYN FocusClass. First, we want to refresh your knowledge about the female pelvic organs, the menstrual cycle, and the basic scanning planes in TAS. Then we dive into the gynecological ultrasound examination. You will learn how to correctly scan and measure the female pelvic organs and IUDs with the POCUS device. We prepared many interesting cases for you to understand more about gynecological pathologies and how to diagnose them with a handheld device easily.

#### Lectures & Quizzes:

- Anatomy
- Pathologies
- IUD Localization
- OGFC (POCUS) - Gynecology

## Chapter 3 | 1 CME

### Obstetrics

This chapter is all about obstetrics. The topics range from how to diagnose a pregnancy with a handheld device to the most

threatening conditions a woman and her fetus can face in late pregnancy. First, you will learn how to do a fetal assessment in early and late pregnancy. Then, based on many cases Rebecca Ertl, MD, teaches you how to diagnose different pathologies and life-threatening conditions like abruption of membranes.

#### Lectures & Quizzes:

- Fetal assessment
- Late pregnancy
- Early pregnancy
- OGFC (POCUS) - Obstetrics
