

DIGITAL LEARNING IS BECOMING A PART OF THE "NEW NORMAL"

Prof. Thomas Binder, founder of 123Sonography, has recently published an article on cardiovascularnews.com about the current state of medical e-learning.

Vienna, 13 August 2020 – The shift towards e-learning was further accelerated by the COVID-19 crisis. Thomas Binder, founder and chairman of 123sonography.com considers how online learning has become a staple for healthcare professionals during the pandemic, and using the case example of a carotid ultrasound: [Cardiovascular News - Digital learning is becoming a part of the "new normal"](#).
