

# 123sonography at the Health Days: Shaping the Future of Medical Education with AI and Adaptive Learning

**Vienna, 03.03.2025** – 123sonography, the world's leading platform for digital medical ultrasound education, will be present at the Health Days. This high-profile event provides an outstanding opportunity to showcase the latest innovations in medical education and advance pioneering research in Artificial Intelligence (AI) and adaptive learning.

By leveraging AI-powered adaptive learning methods, 123sonography enables a personalized knowledge transfer that adapts optimally to the individual needs of learners. The goal is to prepare physicians worldwide more efficiently and practically for the challenges of everyday clinical practice.

## **OneHealth: Interdisciplinary Exchange and the Future of Medical Ultrasound Education**

123sonography's participation in the Health Days highlights the importance of interdisciplinary exchange within the OneHealth approach, which emphasises the close connection between human, animal, and environmental health. Modern imaging and ultrasound diagnostics play a crucial role in the early detection and prevention of diseases and abnormalities—an aspect of growing significance.

## **Invitation to Connect at the Health Days**

Interested partners and professionals are warmly invited to visit 123sonography at the Health Days and explore opportunities for collaboration. More information about the event can be found at <https://www.healthdays.at/home>.

## **About 123sonography**

123sonography is the world's leading platform for medical ultrasound training. Through high-quality online courses, interactive learning methods, and practical training, the platform supports medical professionals in enhancing their diagnostic skills and improving patient care sustainably.
