

123sonography proudly presents its new online course "Prehospital Point-of-Care Ultrasound (pPOCUS)."

Vienna, April 25, 2025 – 123sonography, the world's leading provider of digital ultrasound education, proudly presents its new online course "**Prehospital Point-of-Care Ultrasound (pPOCUS)**." This course is designed for medical professionals working in prehospital settings and delivers in-depth knowledge on the application of point-of-care ultrasound in emergency situations.

The course covers both traumatic and non-traumatic emergencies and provides hands-on, practical content on protocols such as eFAST, FATE, RUSH, DYSPNEA, and CPR. Participants will learn to identify life-threatening conditions including pneumothorax, pericardial tamponade, aortic aneurysm, and pulmonary edema. Additionally, the course teaches ultrasound techniques for diagnosing conditions affecting the abdomen, thorax, and heart.

The experienced emergency and intensive care physicians Dr. Benjamin Thal and Dr. Thomas Hamp, along with paramedic and medical student Chiara Archam, form an interdisciplinary teaching team with cardiologist Prof. Thomas Binder. The course is CME-certified and offers a diploma upon successful completion.

About 123sonography
