

MEDICAL E- LEARNING PLATFORM 123SONOGRAPHY ANNOUNCES PRE- REGISTRATION OF NEONATAL & PEDIATRIC ULTRASOUND BACHELORCLASS

Introducing "EMERGENCY & CRITICAL CARE ULTRASOUND Essentials": A Game-Changing Course by 123sonography

Vienna, Austria, July 2022 The Austrian Medical E-Learning Company Opens its Pre-Registration for the soon-to-be-released Neonatal & Pediatric Ultrasound BachelorClass.

Vienna, Austria: 123sonography announced today the pre-registration for the Neonatal & Pediatric Ultrasound BachelorClass, the company's soon-to-be 23rd online course. The Neonatal & Pediatric Ultrasound BachelorClass is an accredited self-paced class that teaches how to perform and interpret ultrasound in neonates and infants. The course covers ultrasound topics on neonatal heart, lung, abdomen, brain, and spine with relevant clinical interpretations and applications. In addition, the 5-hour course teaches ultrasound-assisted procedures like umbilical line placement, needle aspiration, and lumbar puncture.

"Performing ultrasound scanning on fragile tiny neonates and pediatric patients is very intimidating. Most of the online ultrasound education is on adult patients, which is rarely applicable to neonates," says Belinda Chan, MD Course-Speaker and Neonatal POCUS Director at the Primary Children's Hospital. "My team and I have gained many personal tips and tricks on neonatal and pediatric ultrasound over the years. The Neonatal & Pediatric Ultrasound BachelorClass is an opportunity for us to share our secrets and is unique in demonstrating real-time scanning of neonates and young children."

The objectives of the course are to understand:

- neonatal ultrasound basics of multiple organ systems
- how to perform neonatal ultrasound and optimize image quality
- how to interpret neonatal ultrasound findings with clinical relevance
- how to use ultrasound to assist neonatal procedures

Features and benefits of the new Neonatal & Pediatric Ultrasound BachelorClass include:

- Over 5+ hours of high-quality video content
- Real-life scanning demonstration
- High-quality ultrasound images and clinical examples
- Interactive cases
- Case-based learning
- MCQ questions
- CME credits (pending)
- Diploma & Certificates
- Top speakers (Prof. Yogen Singh MD, Belinda Chan MD, Sasha Gordon, BSc)

The Neonatal & Pediatric Ultrasound BachelorClass is now open for pre-registration.
