

**FREE WEBINAR Health Care and Civil Protection in Crisis
123sonography**

Date: 17.03.2022 17:00 CEST

Duration: 3 hours Webinar + Q+A session

Language: English

LINK: <https://bit.ly/36ibLNZ>

Within only a few weeks, our perception of Europe and the World has changed. The Ukraine crisis has also changed our view on health care. Topics such as catastrophe medicine, radiation protection, aid to civilians and soldiers, and civil defense are now in the spotlight.

123sonography sees itself as an information and content provider to the medical community. While our primary focus is on diagnostic medical ultrasound, we also see it as our responsibility to provide knowledge to all those who want to protect themselves or help others.

Therefore, we put together a program including experts from civil defense, catastrophe medicine, radiation medicine, emergency medicine, and wound management to answer your questions and in an attempt to provide humanitarian aid to all of those involved.

Target Audience

Medical doctors and health care providers
Civilians involved in humanitarian aid
Everyone interested in the topic
Media

Moderation

Univ. Prof. Dr. Thomas Binder
Founder, CMO and Founder 123sonography, Kardiologe, Leiter: Digitale Lehre Teaching Center
Medizinische Universität Wien

About 123sonography

123sonography currently counts 500,000 health care professionals from 175 countries among its international users. Founded in 2009 by Dr. Thomas Binder and located in Vienna, the company offers various online ultrasound courses with international CME certification (AMA PRA-1) (<https://www.123sonography.com/cme-credits>). Since December 2019, following a management change and financial restructuring, the business is now jointly managed by Thomas Binder and Kathrin Biernat. Ultrasound diagnostics is currently one of the fastest-growing markets for imaging techniques in medical technology.

The company's vision is to make medical diagnostics of ultrasound and echocardiography quickly and cost-effectively accessible via e-learning to physicians and medical personnel worldwide in the highest quality and professionalism. All 123sonography courses are certified according to AMA PRA Category 1 CME[2] Credits™. The study material consists of videos, interactive case studies, atlas, demos, quizzes and is accessible to all users. The courses can be taken at once or flexibly in different time frames. In addition, live events are held in various countries and cities worldwide, such as Dubai. Furthermore, partnerships exist with the Medical University of Vienna, the Austrian Society of Cardiology, Sono Skills, the Fachhochschule in Wiener Neustadt, Universal Ultrasound Management, and 3rd Rock Ultrasound.
